

Now Any Woodworker Can Make Serious Money With Their Own Woodworking Business...

"Who Else Wants to Turn Their Woodworking Hobby Into A Serious High Paying Business In Days And Weeks Instead Of Years?"

To: Good, Decent, Honest, Hardworking People Who are Frustrated With Working for Someone Else and Being Limited in the Amount of Money They Can Make, But Would Be Willing to Work If Given a REAL Chance to Create an Outstanding Lifetime Income, Be Your Own Boss, Work Your Own Hours, And Build Up Security by Simply Having Their Own Small Woodworking Business.

Hi, I'm Ed McDonough (yeah that's really me in my home-based woodworking shop with the overalls on!). I've been building custom furniture and cabinetry for over 17 years but it wasn't until 2002 when the company I worked for at the time did me the biggest favor of my life: **They gave me a 14.3% cut in pay!**

You see, I was working as a "corporate nobody" Information Technology Senior Project Manager Consultant at one of the world's largest Fortune 100 pharmaceutical companies, located on the beautiful Charles River in Cambridge, MA (with a magnificent view of Boston), when my boss (and the owner) of the consultant company I worked for paid me a visit because, as he put it on the telephone, "Ed, I want to discuss your future".

It was a beautiful warm sunny day, sailboats were making their way up and down the Charles River, the joggers were out in full force and there wasn't a cloud in the sky. To the average person it seemed like it was just another delightful work day. But to me, I had a **feeling that the axe was going to drop... and drop hard!**

My boss drove to Cambridge that day from his new plush corporate office smack in the center of Springfield, MA (about a 2 hour drive) so he and I could have this "discussion" about my future with his company.

OK picture this: There I am sitting across the desk from him listening to him ramble on about how valuable a project manager I was to his consulting company. How I was the best he had and how he was really "counting" on me to help forge a new, more successful, path for his company... when all of a sudden it happened!

Without stopping to take a breath, without even the slightest pause or quiver in his voice, my boss, the company owner, the guy I trusted to look out for me, told me that there were some internal problems with his business, that he made a few management mistakes and even though he had just renewed the huge contract with the pharmaceutical company, things weren't handled as well as they should have been, and although I had truly performed above his expectations, **I was going to have to take a 14.3% pay reduction!**

But here's the real thing that will bring the tears to your eyes, he said, "It's tough times for all of us" (pause for a moment with a sad look on his face) "We're all lucky to have a job in this economy."

Now a 14.3% may not sound all that bad to you but for me that came out to **a whopping \$15,015.00 immediate cut in pay!** I'm not sure how you would feel if you lost that kind of money out of your paycheck, but it hurt me bad!

I guess it just goes to show you that there is no real job security when you're working for someone else.

No matter how "great" you think your job is, or how secure you think you are in your position, no matter how much you "love" what you do, if you work for someone else (a company or an individual), then you're just a number in a file and **your pay can be reduced, or your position can be eliminated, at anytime, for any reason!** Sadly, it unknowingly happens to good folks every day!

On A Warm Sunny Day In Cambridge, MA, I became a Full-time Woodworker... By Default

Well, right at the exact moment that I heard that my income was getting cut faster than if it was done on a 12" laser guided chop saw, I became 100% committed to making sure it would never happen again.

I have to tell you, hearing this just pushed me over the edge! Believe me, it hit me over so hard it made me realize if I was ever going to be in full control of my money, my job and my financial destiny, that I had to do it myself, work for myself, be my own boss in my own business.

I knew I had to be the one at the top making **decisions** if I wanted "true" security for myself and my family!

Like the heavens opening up with a blinding ray of light shining down, I knew that very instant the only way I was going to be able to control my financial destiny was to take my woodworking hobby and transform it into a full-time profitable woodworking business that would, without a doubt, consistently provide me with a solid 6 figure income!

Well, that was easy to say, but how the heck do you go about doing that?

For days I kept asking myself over and over and over, how can an average, everyday, regular "worker bee" guy like me, a college drop-out with no formal business background what-so-ever, get to be the "guy" on the top? How could I possibly make the same **full-time 6 figure income** I did as a Senior Project Manager Consultant while being my own boss in my own woodworking business, while working out of my home and **without taking a "big" risk?**

I have to tell you, the more I continued to think about it the more it started to sound pretty darn scary! You start asking yourself:

- **How can I make a steady full-time income?**
- Who will buy my products?
- **What are the legal things I need to know?**
- How can I really make this "dream" come true?
- **How can I be a successful woodworking business owner all by myself?**
- Is it possible?
- **Do people really do this kind of thing or am I just nuts?**
- Can a regular "Joe" like me, with no business background and just average woodworking skills actually do it?
- **Can I really make a comfortable 6 figure living at it, the same as I'm doing in Corporate America?**

Does this sound familiar?

I have to **openly admit to you that everyone of these questions** went through my head a zillion times too. But, before I let you in on where to get the answers let me share something with you that you must know so that you can be successful too.

You see, I love woodworking and I've always wanted to work for myself. For years I kept dreaming of having my own business some day and being my own boss, but I didn't know anything about how to get one started, especially a successful business that was going to

CLICK HERE TO LISTEN TO A SPECIAL MESSAGE FROM Ed!

consistently pay me a 6 figure income.

Does this sound like you too?

The Huge Understated Difference Between Making Money and Having A Profitable Business

Here's something you need to be aware of right now:

If you think getting all the equipment you need, buying a truck and taking out an ad in the local paper means you're in the woodworking business, **You Are Wrong!**

Since grade school we're taught how to do a job, and even how to get a job, but no one ever taught us how to have (or start) a business.

FACT: 99.7% of the woodworking businesses out there today only know how to make money - Only a few  actually know how to make money and a profit.

Frankly, anyone can make money selling their woodworking. Absolutely anyone! But, only a handful of woodworkers understand the difference between making money and having a profitable business.

Do you want to know what the difference is?

It's really simple. The woodworkers with businesses that are profitable have two things:

- They have a good knowledge of how to woodwork
- They have a "better than good" knowledge of how to operate and manage a successful woodworking business.

And here's the funny part: A woodworker with a profitable business **never has to worry about making money**, because they know if their business is profitable, if it can pay for itself, keep itself running (pay for all the tools, the overhead, the office equipment, the company vehicle, etc.) then they will just **automatically get paid** the handsome salary they want.

On the other hand, a woodworker that only knows how to "make money" with their woodworking, constantly struggles to keep their business afloat. They literally **cheat themselves out of the big "income"** because they have no plan to follow.

No Plan = No "Profit"

If your woodworking business doesn't make enough money to keep itself running then the expenses have to come out of your income! The majority of woodworkers don't understand that they should get paid AND their business should make money too!

So, what kind of woodworking business do you want to have?

It's Not Your Fault That You Didn't Know...

Look, let's be honest with each other here, you have the woodworking skills to make it in your own woodworking business, but what you don't have is the woodworking "business" skills that you need to be consistently profitable and make a great income. If you did, then my guess is you wouldn't be reading this page.

It's OK to admit it, I didn't have them either! Remember, no one ever showed us! Matter of fact, **no one ever told us there was such a thing as woodworking "business" skills**. So you see, it's OK that you didn't know and it really isn't your fault!

Think about this for a second: You can take a million courses and classes on how to do just about any kind of woodworking, and not one of them will spend even one second on telling you how to use those skills to make a living, never mind a really good living! They teach you the skills and then leave the rest up to you!

You know why? Because there **aren't a lot of people out there that can "really" show you how to do it**: how to have your own, consistently profitable woodworking business, using your existing woodworking skills, while working out of your home or small woodworking shop.

Matter of fact, until now, no matter how much you were willing to spend, no one had a single, proven, easy to follow plan that gives you everything you need to do exactly that!

But now you can make a smart investment in your future so that you'll have your own profitable woodworking business that pays for itself, pays for all your tools, pays all the business expenses, and pays you a great salary too!

**Introducing The World's Only Multimedia Business Tool...
Custom Designed for Woodworkers...**

"How to Have Your Own Profitable Woodworking Business... in as little as 33 Days"

Your Complete Woodworking In-Home Multimedia Workshop!

Audio, Video and Workbook All in One Tool!

"Finally, the first practical, step-by-step, easy to follow plan to your own, very profitable Woodworking Business... No Matter What! Even if you've never sold a single thing and don't have a business background... Guaranteed!"

A to Z, soup to nuts, this is by far the most comprehensive woodworking business tool you'll find on the planet! It's a full in-home hands-on workshop that **anyone can follow!** A simple, step-by-step proven plan that shows you how to easily plan for business success, **while leaving nothing to chance**. It reveals all the secrets: every single business tool, document, tip, trick, strategy, resource and technique that WILL lead you by the hand to planning, starting and running your very own profitable full or part-time woodworking business from day one; and how to stay that way forever! Guaranteed!

Here's What Successful Woodworking Business Owners Are Saying About the Workshop:

"Ed, I've just finished reviewing your "How to Have Your Own Profitable Woodworking Business" workshop, and I wanted to drop you a line. I thought it was, hands down, the best business solution for woodworkers I have ever seen. It's exactly the kind of information any woodworker needs to be successful in the industry today, and well written as well. I would recommend it without hesitation to anyone who currently has, or would like to own, a woodworking business."
Gregory Sullivan - Owner - InstantAntiqueFurniture.com

And the best part is you can **Get Started Immediately from Home in Your Spare Time**. You can go at your own pace and you don't even need a business background to make the money that you want!

All the "heavy lifting" has been done for you, just follow the workshop's simple plan!

Internet Scams Are Everywhere... So Why Should You Believe Me?

Well, let me take a minute to tell you a little about myself because frankly, the internet can be a real impersonal place. I know it's not easy to know who to trust, and there are just as many scams as there are real folks with solid information you need and want, so as you continue to read every word on this page, you'll quickly see that I'm a "real" person, someone who is up-front, honest, ethical and reliable. I'm a regular 46 year old guy, with a wife, a dog, a kid going to college, a mortgage, bills to pay, and just like you, I'm a woodworker too!

As I told you earlier, I've been building custom furniture and cabinetry for over 17 years. I'm also proud to let you know that since 2002 I've gone from a "corporate nobody" to the owner of [Boston Accent Furniture](http://BostonAccentFurniture.com), a very successful, well known and highly profitable woodworking business located in Walpole, MA. You can learn more about my woodworking business (and see my work) right here online at BostonAccentFurniture.com and you get an "unbiased" look at my business at the [Better Business Bureau](http://BetterBusinessBureau.com). Also, if you want to find out more about me, just [Click Here](#).

Click the Play Button to Find Out if Ed is "For Real!"

How Would You Like to Have a Business that Pays You a Big Income, Covers All of its Operating Expenses and Consistently Brings in a Profit Margin of Over 13%?

Here are just a few examples of the projects I worked within the last 12 months:

- Maple Display Cabinets, Foxboro, MA \$11,502.75 - **18.29% Profit**
- Cherry Bar & Cabinet, Malden MA, \$9,408.00 - **13.91% Profit**
- Oak Built-in Entertainment Center, Worcester, MA \$6,762.00 - **17.60% Profit**
- Maple Built-in Entertainment center & Cabinets, Abington, MA, \$14,045.85 - **17.72% Profit**
- Walnut Display Cabinets, Boston, MA, \$11,162.55 - **13.89% Profit**

It's **easy** to consistently have customers lining up with money in hand, ready to pay you top dollar **2, 3, even as much as 4 months in advance**, when you have the right plan to follow!

It's **easy** to have your business pay you a big salary, pay for all of your tools, pay for all the operating expenses, **and make a nice profit on top of that**, when you have the right plan to follow!

I want you to take a deep breath and slow down for a second because if you made it this far down the page then you need to really pay close attention to what I'm about to share with you.

Take a breath... Ready?

I want you to know that you have **my personal guarantee, and I will swear under oath**, that the plan I used to start my profitable woodworking business, the plan that pays me a full-time salary, covers all my business expenses and generates a nice profit above and beyond that, is the **exact plan that is available to you** right now!

Let me show you how simple it is to get your business started right away!

One Size Does Fit All!

Look, everyone has an area that they excel in. Some of us are great athletes, some of us have great business minds, some of us are great woodworkers and some of us are great planners.

Above all, I happen to be great at defining and planning projects, and then **carrying out the plan to total success!**

You see, I spent the last 10 years of my "corporate nobody" life working as a Project Manager, the last 3 years as a Senior Project Manager consultant.

As a Project Manager you are trained to get all the facts, clearly define the goal, identify all the tasks needed to obtain that goal, prioritize the tasks, put it all into a written plan and then execute and manage the project against the written plan. Much easier said, than done!

The scope of some of the projects that I managed included project teams consisting of hundreds of people; with budgets in the millions of dollars. In addition, every project that I worked on had challenges and changes in the overall project direction that were directly proportional to the size of the project itself!

Now, I'm not telling you this to brag, I just want you to know that the process I developed to keep my head above the water as a "corporate" Project Manager, and successfully bring every project I managed in on-time and within budget, is the same plan I used to start my woodworking business! And the **exact "System for Success" that together, we will use to start your woodworking business!**

Let me sum it up this way: Once I gathered all the facts, clearly defined my goal, identified all the tasks needed to obtain that goal, prioritized the tasks, put it all into a written plan, I knew I couldn't fail! I knew once I had a "roadmap" to follow the rest was easy! So, the hard part is already done for you!

Click Here To See Proof of "Actual" High Profit Jobs I Worked On In 2004 And 2005

I can show my wife, "here's a plan, we can do this!"... keeping her happy and secure!!!!

"Ed, I am blown away by your program. You are a woodworking angel sent to me and my family. I am jazzed by the detailed info, price setting and business plan - both a general one and one perfect for woodworkers. I'm not trying to throw compliments at you, but I would encourage everyone to buy your workshop in a heartbeat. The download was easy and your instructions were also easy. The audio and video portions work fine.

On a personal note, your program has forced me to slow down, THINK, and follow the 33 day plan. I was looking into getting a small business loan, but guess what??? I had NO PLAN! Now, what you have brought into my life, is really a blessing. I can show my wife, "here's a plan, we can do this!"... keeping her happy and secure!!!! Is that important or what? Thank you very much!!"

**Herb Zacks of Herb Zacks Woodworks
Penngrove, CA 94951**

**This Just In - Herb Got His Loan!
Listen first hand to the tremendous results he's gotten
using the business tools that come with the workshop!**

Why Spend 30 Years Trying To Figure It Out The Hard Way?

Listen, I heard all the crap about how a business needs to "stand the test of time", how my woodworking business ([Boston Accent Furniture](#)) is profitable because I live near Boston and literally 10 other reasons (that I'm not going to waste time with here) why only my kind of woodworking business can be profitable.

It's all a bunch of garbage! The true reason, and the only reason, my business is profitable is because I **planned for it to be that way!**

Honestly, I'm no "Super Know-it-All Business Guru", I don't have a business degree and I haven't invented anything new here. My woodworking business is successful, and profitable, because I did all the right things to make it that way, and I continue to do all the right things to keep it that way!

Matter of fact, it's the only difference between a business that succeeds and one that fails. You have to know what to do to make your business successful, and then know what to do to keep your business profitable.

What the **How to Have Your Own Profitable Woodworking Business** in-home digital multimedia workshop gives you is the "right" plan, along with all the tools you need, in a simple, logical, intelligent, systematic easy to follow format.

You just follow the plan, in the order that it's drawn out for you, and in no time you'll have your profitable woodworking business started too! **There's nothing left to chance and it's quick and easy to follow!**

Here's what The How to Have Your Own Profitable Woodworking Business In-home Digital Multimedia Workshop has for You...

- Shows You the Difference between just "Making Money" and Having a Profitable Business.
- **Reveals the 3 Little-Known, Must-Have Woodworking Business Secrets.**
- Exposes the 10 Simple Steps to Immediate Success that Anyone Can Follow.
- **Discloses the "Most Critical" Business Skill You Need for Maximum Profitability.**
- Uncovers the Obscure, Straightforward, yet "Proven", Woodworking Plan for Huge Profits and Long Term Security,
- **Shows You How to Consistently Get the "High Paying" Profitable Jobs Over and Over.**
- Hands You the Fastest, Most Intelligent, Logical Way to Create Your Own Steady Stream of Incoming Cash.
- **Reveals My Proprietary Secret Method to Pricing Jobs (the Project Pricing Wizard) for Maximum Profitability!**
- Unveils the Step-by-Step, Surprisingly Simple, Fool-Proof Approach to Easily Promoting Your Business.
- **Gives You the Respect You Deserve from Your Community, Family and Friends!**
- Helps You Get All of the Tools and Equipment You Want Without Touching Your Income!
- **Let's Your Spouse, Partner or Significant Other Work with You Side-by-Side.**
- Proves You Don't Need a "Business or College Degree" to Have a Profitable Woodworking Business.
- **Hands You Every Single "Business" Tool You need and Shows You Exactly How to Use Them.**
- Get's Your Business Started and Making Money Faster Than Trying to Do It On Your Own!

Why A Digital Download? Why Not a Big Fat Manual, CD and DVD?

I guess to some folks it may seem a little strange to pay for a real **Woodworking Business Tool** that you download from the internet, but it really makes smart "business sense" to do it all digitally for two reasons...

And they both effect you!

First, I didn't want you to bear the burden of the additional cost!

You see, by the time you add up the cost of getting the workbook printed, buying binders, having CDs duplicated, paying someone to put it all together and package it up, get boxes and packing materials, have someone always available to do the shipping and then have to pay to store all the inventory somewhere... it would add almost \$100 to the cost. Not to mention you'd pay a shipping charge on top of that!

And for what? **The workshop wouldn't change one bit**. All the information would still be the same, except it would be printed on a piece of paper and bound in a bulky manual!

Second, this is a **Multimedia Workshop**. The workbook, the audio tracks (called audio clinics) and the videos (called video mini-courses) are neatly combined into one, simple to use file. So, **you can download everything right now and get started right away!**

As you go through each day of the workshop, there's no flipping through pages in a clumsy binder, then trying to finding the right audio track or video on a CD that's somewhere else, all while your trying to learn something really important to your future!

Nope, **everything is laid out in a logical, easy to follow, systematic order so it's right there at your finger tips**. As you go through each daily lesson, you simply click on a button and you're playing the audio tracks and videos that go along with it! No searching around and losing track of what you're trying to learn!

Instead you get Easy to Learn! Simple to use! Practical to follow!

In addition, the 23 "Woodworking Business Tools" are meant to be used right on your computer. Take for instance, the proprietary **"Project Pricing Wizard"**. You simply enter your information into this amazing tool and in seconds it automatically tells you what to charge for your products so **you get paid the salary you want AND maximize the profits for your business!**

You couldn't do this on a piece of paper without a lot of tedious calculations... and probably a few mistakes too!

So, by the workshop being "digital" instead of "physical" paper, it makes your learning easier and allows me to give you the tools you need (the exact tools I use) to run your business.

It allows you to get started faster, makes your learning faster, and makes your business run better! Digital multimedia, the only way to go! So simple you can download it right now and...

Let Me Personally Work Side-by-Side With You So You Get It Right The First Time!

My only goal with the workshop is to help you succeed! I believe if you're going to do something, then do it right or don't do it at all!

Let me take a second to tell you the reason I decided to develop this "tool".

Actually let me tell you both reasons:

First, my lovely wife still works in the corporate world.

Second, I love to teach.

Let me explain. For years folks have been asking me to teach them how to woodwork so I've been thinking about it for a while. Matter of fact there was a time back when I was in the corporate rat-race that I ran a technical education department. I developed (and taught) several different training courses that were responsible for bringing in over \$537,607.43 of revenue in a 2 year period. **So not only do I love to teach, but I'm pretty good at it too!**

At the same time I was thinking about doing some teaching, **my wife found out** that the company she works for is moving to NY and that soon she'll be out of a job. So that made me realize that it was time to get her into her own business too!

Anyway, to make a long story short, I really got started thinking that **I should be teaching people the "business" part of woodworking** instead of just woodworking itself, because there's no single course, or tool, that shows you how to do it. Sure, there are a few lame books out there that make big promises about starting a woodworking business, but upon close inspection they really teach you more about woodworking than they do about having a consistently profitable woodworking business.

Well, because I already have a **proven plan that is so easy anyone can follow it to successfully start their own woodworking business**, and because my wife wants her own business to run, I decided to develop the complete in-home multimedia workshop you're about to get, and let my wife use it to get her business started. This way she could quit her job and be her own boss too!

Here's What Woodworkers Just Like You Are Saying About the Workshop:

"I really would not even have considered being a professional woodworker without being able to reduce the learning curve by using all the tools you have as part of your workshop. You're experience and advice is one half of it, and the tools you have provided are the other half. You really need both to make a successful change in careers."

"I would guess if someone already had their woodworking business going for a little while, maybe needed to take it to the next level, all the other tools become really valuable. The Project Pricing Wizard, The Production Planing Schedule and the Customer Invoice aren't just used for starting up, but I use them for every job now. "

Tom McNamara of Nashua Custom Cabinetry
Nashua, NH 03063

[Click Here](#) to read the complete letter I recently received from Tom.

Now of course, **I put together all the training material first hand and I'll be doing all the business consulting**, but she is taking care of everything else; so don't be surprised when she answers the phone, or sends you an email!

So, to help you get the most out of the workshop I decided to use the power of internet technology to put it together, that way **you could have me right by your side, when you need me the most**, as you follow the already proven plan through the workshop!

Why This Woodworking Tool is Head and Shoulders Above Any Book, eBook, Video, Business Plan or Seminar Available Today

The How to Have Your Own Profitable Woodworking Business in-home digital multimedia workshop is exactly that! It's a full blown **woodworking tool you use right on your computer** that includes both video and audio files, along with the simple to follow digital workbook, to make each point crystal clear and leave nothing to chance.

Let me explain. The workshop has been neatly packaged into a simple to use file that contains all the written information along with 57 audio tracks so that I can personally "talk" you through every important point of the workshop. When audio isn't enough, there are video files (called Video Mini-Courses) that I use to help you clearly nail down each topic. You simply click on a button and in an instant you're listening and watching!

And, you can read, listen and watch it hassle free, as often as you like, because it's right there on your computer when you need it. No downloading or waiting for internet connections. **It's yours to use forever and you'll always have it right there on your computer.**

Also, all the "must have" proprietary woodworking business tools that come with the workshop are right on your computer as well. A simple click and you're effortlessly using any one of the **23 specially designed tools** that come with this complete woodworking workshop!

It's simple to get, easy to use, leaves nothing to chance and is always there when you need it! And, **it's better than an expensive live seminar because you can review it over and over at your own pace**, as often as you like!

And the best part is, you can try it **Risk Free for One Full Year** - More on this later, first let's answer this...

So, How Much Can You Make In Your Own Woodworking Business...

Let's set the record straight. First I want to be frank with you, If you're trying to "Get Rich Quick", find some kind of mysterious moneymaking loop-hole, or looking for the "No-Effort Easy Way Out", **I can not help you.**

But, if you're willing to put some effort into a **real chance to create an outstanding lifetime income, be your own boss, work your own hours, and build up security for yourself and family**, then I'm 100% positive you can easily do it.

Honestly, I can't tell you how much you'll make with your woodworking business. Just because **I have consistently made a better than average income** with my business since 2002, doesn't guarantee that you will do the same. Because everyone is different and has a different set of skills, drive and determination, it would be unfair for me to set your expectations.

Here's What I Can Promise You!

I can promise you that the How To Have Your Own Profitable Woodworking Business digital multimedia workshop has everything you need to make your woodworking business an honest success. It will **clearly show you the step-by-step, intelligent, logical path to quickly** assemble your business from the foundation up, so that you'll be able to be your own boss, work your own hours, get the respect you want and provide you with the security you deserve.

What Should You Cheerfully Pay For a Tool Like This?

By now you're probably asking yourself:

"What is it going to take to get Ed on my team, and lead me by the hand, so that I can have my own profitable woodworking business?"

Let me take a moment to tell you about the grueling process I went through to develop this perfect plan so you know what you're up against, just in case **you get the wild idea of trying to do it yourself and go-it-alone.**

First I started by doing some research. I put in 207 hours digging deep to uncover what I (and everyone) must know about starting and owning their own small business and how to make it profitable.

Once the research was wrapped up I hammered out another 187 painstaking hours of planning to develop the easy to follow workshop that will simply help you have great success right from the start! I also read 16 books cover to cover (some of them more than once - 48 full hours of just reading!).

I spent over a week (another 56 hours) "honing" all the fill-in-the-blank business tools needed to get you started fast, and then sorted through hundreds (literally) of web pages (59 hours on the computer) to find every single thing I needed (and didn't need) to know in order to make the plan a complete success from day one!

When I totalled up the hours it came to 557; **that's over 69 days** of research and planning, before I even got started!!

So, let's say you were just crazy enough to do the same (instead of taking the easy way out by getting the workshop) and let's say you only charged a measly \$10.00 an hour for your time. You can quickly see that the development cost of a project like this is enormous! That comes to a whopping $10 \times 557 = \$5,570.00$

\$5,570.00 - Do it Yourself Cost

And on top of the huge cost, there's no guarantee that you'd even be on the right track if you go it alone! You could easily spend double or even triple the time I did if you didn't get it right the first time.

So maybe you want to go a different route. Let's say you went out and hired a decent personal business consultant to tutor you one-on-one in how to start a business, for just one single hour a day over the next 33 days, and they only billed you at their very conservative rate of only \$25 per hour, that figures out to be a big fat $25 \times 33 = \$825.00$

\$825.00 - Personal Business Consultant Cost.

Now you may think \$825 is a little bit easier to handle except  consultant would only be advising you how to get a "generic" business started, not a woodworking business. And, they certainly wouldn't be able to hand you the 23 proprietary woodworking business tools you absolutely need, so you'd still have a ton of work and research to do on your own!

Honestly, What is a Woodworking Business Tool Like this Worth to You?

Ask yourself this question right now:

How much am I willing to invest to get my hands on the single, proven plan that will provide me with an income for the rest of my life, give the freedom I've always wanted and allow me and my family to have peace of mind and security?

Frankly, it all comes down to a serious business decision that you need to make right now. Do you go it alone, do all the time consuming, painstaking research yourself, not knowing how many things you'll have to try and how long it will take before you figure it out... if you can?

Or do you take a stand, make a practical, intelligent business decision, and invest in a proven business tool **with an iron-clad guarantee** (more on this later) to show you the easy path to success and profitability with nothing left to chance?

It's your call to make right now!

If you're serious about being your own boss, working your own hours, deciding how much money you want to make and being a respected business owner instead of a "nobody" hacking a living off of some one else, then **the obvious, sound business decision** should be crystal clear.

How much better will your life be when you have your own woodworking business?

Just think...

**No More Money Worries
No More Stress Over Paying Bills
Never Think About Losing Your Job Again**

You Can Do It With The Only Plan Custom Made for Woodworkers...

Recently I held two different conference calls with folks that already have the workshop and have completed it. I asked them to honestly tell me what they thought I should charge for this unique woodworking business tool.

The top price was \$1,500.00 and bottom price was \$500.00. Bless them all!

They all thought the current price I was offering this exceptional tool at **was way too low! All of them!**

I took the time to speak to each one of them and everyone said they would happily pay more because it has had such a powerful impact on their life by showing them how to get their woodworking business started for maximum profitability.

One of them even told me that they would have been a miserable failure had they not gotten the workshop and followed the clear systematic plan for success!

So here's what's been happening to the price:

- In January the introductory price of the workshop was a low \$297.
- On May 16th, 2005 the price went up to \$357.

Now, even though the price has gone up, I bet you're still pretty startled to see the cost of this exceptional one-of-a-kind business tool so low yourself, especially considering that this meager one-time fee can bring in **thousands of dollars of income to you for as long as you want!**

And, even though it's a real "business tool" (an expense you can probably write off of your taxes) that I could **easily let go for hundreds more**, just like my students have suggested, I didn't want to make the price so outrageous that honest folks who really want the best out of life (and are willing to "roll up their sleeves" and put the effort into having a serious woodworking business) wouldn't take advantage of using this practical, easy to follow proven plan.

However, I can't just "give" it a way either because my wife's business depends on it. Plus there's another problem with the price being so low...

You see, our accountant keeps hammering at me to get the price up and bring it in line with what a serious business tool like this should cost.

He knows it's **greatly under-priced** right now and being a "bean counter" he's annoyed with the fact that I'm holding  next price increase. But I gotta be frank with you, I'm not going to be able to hold him off much longer or I'll be looking for a new accountant! So, at least for another week or so, the price **will remain at the still very low "under-priced" cost** of only **\$357**, making it affordable for anyone to [grab it right now!](#)

Think about it, for under **98 cents** a day, **less than a cup of that coffee you have every morning**, you can have the only **digital multimedia woodworking business tool in the world** that will show you how to make the income you always wanted to, doing something fun, that you already love to do, even while working from your home! Woodworking!

What other business tool can you invest only 98 cents a day in that has this much potential to give you everything you want and let you be a full-time woodworker?

I can't think of any!

But you have to hurry to get it for this low price because **as history shows, the price will be going up AGAIN**, never to return to the meager low cost that it's being offered here today. So, [click here to grab it right now](#) for only \$357! And then...

Let's Go Fishing!

There's an old saying: Give a man a fish, feed him for a day. Teach a man to fish, feed him for a lifetime! The How to Have Your Own Profitable Woodworking Business in-home digital multimedia workshop teaches you how to "fish" and "**feeds" you for a lifetime!**

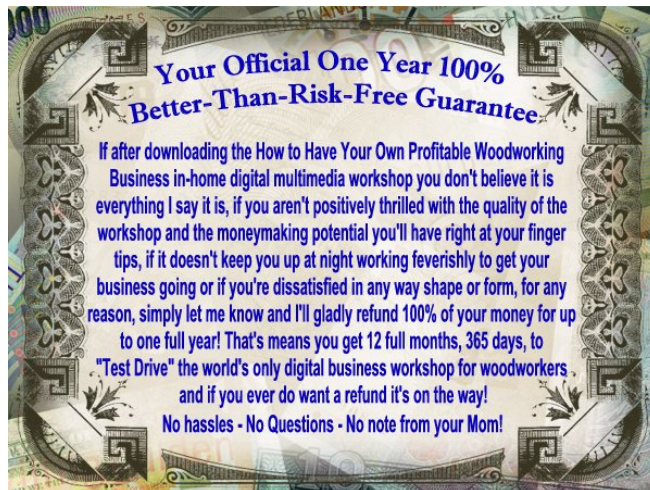

It truly has everything the serious woodworker needs to have a real professional woodworking business up and running in no time! And I'm so sure that once you download it and begin to follow the easy to use, common sense, intelligent, systematic workbook for yourself, along with the 23 proprietary business tools that are included, you'll agree 100% it has everything you need.

But, if you don't, if you feel I haven't given all the tools you need to get your business started, simply let me know and I'll make sure you get a **prompt, full refund for every penny you paid!** You have my word and here's the ironclad written guarantee to prove it!

Your 100% Better-Than-Risk-Free 1 Year Guarantee If You're Not Happy You Get Your Money Back!

In case you have any lingering doubts whatsoever, I want to make this opportunity as risk-free as possible. And actually I want to make it Better-Than-Risk -Free. So, I personally guarantee you'll have every tool, document, tip, trick, strategy, resource and technique you need to get your own woodworking business started with my written ironclad guarantee.

Here's My Personally Guarantee!
Click Play to Listen

Why Would I make such a lopsided guarantee?

Well, the truth is I'm not worried about refunds because I've seen how powerful and laser accurate the information in the workshop is with my own business and with the other woodworkers I'm closely working with.

In fact, once you get your hands on this information and see the real incredible potential for yourself, you'd have to be almost insane to return it!

Everything you could possibly imagine, and everything you've heard about how great it is to have your own business, be your own boss, work your own hours and be in total control of your financial destiny and long term security of owning your own "profitable" woodworking business is true... But there's one big secret...

The Hush-Hush "Secret" of Super Successful Business Owners

Studies have shown an important fact about the achievement of most successful business owners (woodworking business owners included).

They had a mentor.

They had someone that took them under their wing and showed them how to be successful and profitable first hand by eliminating all of the guesswork!

If you're looking for books, business plans or an online course on how to have your own business you certainly won't find a shortage of them.

But if you're looking for guidance from someone who has **"actually done it"**, who has helped others do the same, who can hand you a logical, intelligent crystal clear plan, and who will openly share everything with you, then I doubt you'll find many qualified candidates.

A good blueprint, followed by in-depth accurate, real-life information (like the one you'll receive with the workshop) would have saved me hundreds of hours, tons of mistakes and been absolutely priceless when I was getting my business started. In fact, when I actually sat down to put the workshop together, my goal was not only to give you what I had, but everything I wished I had.

One of those tools, the overall blueprint of what it takes to have a profitable woodworking business, is included with the workshop. It's called the **Business Startup Checklist**. With this one single tool alone, and nothing else, **you could successfully start your own woodworking business**, but please don't try it! Make sure you use it along with all the other incredible tools you get!

Here's What The Newest Workshop Graduate Wants You to Know About The Workshop:

"I found the woodworking business course to be an extremely effective, systematic and comprehensive experience that has provided me with invaluable information and tools that I will be able to utilize in the formation, continuation and long-term growth of my own operation. I have had some formal business training, but this course is all about practical and tested methods.

My particular situation shows how versatile this course really is. I wasn't ready to go full-time into a business, so I went through the course slowly and step-by-step over a few months. The course was set up with this in mind, and all the different sections were carefully organized so I could easily review what I had covered previously, and plan the next steps in the process easily.

Along with the numerous templates and business tools provided with the course, I found the planning aspects to be the most beneficial. I was able to form a clear business plan, identify my own desires and goals, isolate the areas I needed to improve in either my skills or equipment, and develop a very focused strategy that was tailored specifically to my own individual situation. Rather than send you on your way at the final day of the course, Ed has made it clear that he will be available to assist in the future if questions arise, and truly wants me to succeed. This course will no doubt be the "glue" that holds my business together, by giving me a solid foundation in good business practices."

Mike Logman
Mystic, CT 06355

Listen, there's something else I need to mention and please don't take this the wrong way.

I'm going to tell you the truth about this workshop. Woodworkers don't buy it. They never do.

Frankly, a woodworker doesn't "get it". A Woodworker thinks by having all the right woodworking tools, putting an ad in the local paper, getting a truck with their name on it and telling a few friends about what they're doing, that they started their business. Wrong! What they've really done is set themselves up for a lot of disappointment and financial heartache!

So don't make a random decision to get the workshop, **make an intelligent business decision instead!**

Put on your "business owner" hat right now and start thinking about having a real business. A business that will pay you the income you want for the rest of your life doing something you love.

Make a serious, intelligent business decision to find out everything you need to know about planning, starting, promoting and operating your own profitable business **before you do anything else!** You'll be proud you did, respected by all and have a great business to show for it!

Make the smart business decision to invest in your future and get this simple to use, easy to follow digital multimedia workshop right now, and take full advantage of the **1 Year 100% Better-Than-Risk-Free Guarantee**, so that you'll have everything you need, along with my personal help, to get your professional woodworking business started!

Don't just have a woodworking business that makes money... **Have a woodworking business that pays for your tools, pays all the business expenses and pays you the salary you want, for the rest of your life.**

Here's how to easily get your Better-Than-Risk-Free woodworking business workshop today... So you can get Started Right Now...

Before the price goes up Again!

It doesn't matter if it's 2:00 a.m. in the morning!

You can use your choice of Master Card, Visa, Discover, American Express, or PayPal.

Hey my friend, life is short so if you're serious about creating an outstanding lifetime income, getting out of the rat-race and being in control of your income and destiny forever - there's no excuse for letting this opportunity slip through your fingers.

Especially while you can still get it at the very "under-priced" cost it's being offered here today and try it with absolutely No Risk! As history shows, the price will be going up again so... Why Wait?

Make the money you want now and have the life you deserve! The next move is up to you.

Oh, by the way, if you have any questions about the workshop, or you just want to make sure I am a real person, **call me at 508-668-2650**. (I may be in my shop, so leave a message if I don't answer and I'll call you right back)

If you rather email me, then just send a note to questions@profitfromwood.com and I'll respond to you via email.

No matter which way you want to communicate, let's talk directly if you have any questions about getting your woodworking business started. I look forward to working with you!

Your Woodworking Friend,

Ed McDonough
Woodworker, Author, Woodworking Business Owner

P.S. Back in 2002 I made a choice to get out of the corporate rat-race forever and get control over my income! It took a lot of long stressful sleepless nights and many, many hours of research (557 of them) to find everything I needed to make having my own woodworking business a reality. For you it's a lot easier - In just 33 days from today you can be well on your way to making a great part-time or full time income with your own profitable woodworking business or... you could be in the exact same spot you are right now. It's your choice!

P.P.S. The bottom line is this: If you were going to learn to drive in the Daytona 500 who would you select to teach you how to win: your high school driver education teacher or a professional NASCAR driver like Jeff Gordon? "No Brainer", right? You'd pick the one that is going to give **you the best possible chance to win**, the one that's "actually" done it!

The How to Have Your Own Profitable Woodworking Business... in as little as 33 Days digital Multimedia Workshop is a proven winner. It's your fastest way to get your business going, geared for profit, and headed for success! It's your single best chance to turn your woodworking into a full-time (or part-time) income and **say goodbye to the "working for someone else" rat-race forever!**

The complete digital workshop (through which you get **me to personally guide you step-by-step** through everything you need to do) with the 57 audio tracks, the one-on-one Video Mini-Course training, along with the one tool that would allow you to be profitable and successful even if you had nothing else (the Business Startup Checklist) all backed by the boldest 100% **100% More-Than-Risk-Free Guarantee** you'll ever see, is your **ONLY** surefire way to start your own profitable woodworking business without anything left to chance. It's the smart business decision for the woodworker serious about having their own business, being their own boss, working the hours they want and being in total control of their financial destiny and long term security.

[Click Here to Order Safely and Securely Online Right Now](#)

P.P.P.S. Of course I realize that you can go out and find some books that are 1/10th or maybe even 1/100th the price of this complete, in-home multimedia workshop and the 23 specially designed business tools that come with it. Frankly, I probably own copies of them all; some are OK and most are pretty shallow, I guess that's why they're priced that way. I know that this is probably the most costly in-home workshop out there and I make absolutely no apologies for that - the truth is it would still be a tremendous bargain at 10 times the price just like the folks who already have the workshop have suggested.

Take a look at the [25 Frequently Asked Questions](#) I get bombarded with and I dare you to come up with a reason why this isn't the best investment you could ever make in yourself, your future and your woodworking business.

Remember: As history shows, the price will be going up soon so why wait another second? - Get your workshop right now!
